Title: Assistant Manager / Associate – Enterprise Architecture

Job Role & Requirements:

- Assist in defining the functional and technical architecture of the organization.
- Collaborate with business stakeholders to understand business objectives and align technology solutions accordingly.
- Contribute to architecting highly available as well as scalable business systems and solutions to meet business needs for rapid growth.
- Evaluate emerging technologies and trends to identify opportunities for innovation and optimization.
- Provide guidance and expertise to project teams on architectural best practices and standards.
- Ensure business and IT alignment from a technological aspect by interacting with higher management as well as business units.
- Analyze current processes as well as functional architecture and propose enhancements for further improvement.
- Conduct architecture reviews and assessments to ensure compliance with established standards and guidelines.
- Develop and maintain architecture documentation, including diagrams, models, and technical specifications.
- Assist in leading cross-functional teams in the design and implementation of enterprise-wide solutions.
- Drive continuous improvement initiatives to enhance the effectiveness and efficiency of the enterprise architecture practice.
- Stay current with industry best practices and standards related to enterprise architecture as well as technology governance.
